Brief Summary	Despite huge demand for AHPs services, the allied health sector is highly segregated in India and lacks a uniform curriculum for producing qualified, skilled and competent AHPs. The objective is to assess the current status of AHP education in India and to design and develop the key quality indicators that are essential for providing quality AHP in India. This study will be conducted in four phases: Phase I - a literature review of the national and global status of AHP education; Phase II & III: Developing a questionnaire and a cross-sectional survey to identify the current status of AHP education; Phase IV - Quality indicators identification.
